Photo Cortesía: Fatcamera/E+/Getty Images As he begins to plan his family, it is natural to reflect on how much he would see. Whether I expect to have a child or six, there is no correct or incorrect answer when it comes to size. In addition to things outside their control, there are several factors that can evaluate their decision to have more of a child. From finance to family dynamics, there are pros and disadvantages for the family of any size. To help you decide what family size it can be a good option for you, we have seen the advantages and disadvantages of families of all size. Big Family Benefits in a big family, everything is more big. For some parents, this is an advantage. There are more personalities, more people to love, more children under their roof and more to play. Photo Cortesía: Marko Geber/DigitalVision/Getty Images, an important benefit are the relationships that their children have between Sā. With more children, each child always has a company. As small children, they always have a game of games. This helps take part of the pressure from you and your partner when you need a few minutes to do something. As the greatest children grow old and the gaps are extended among the children, it will also find that they have incorporated. Greater children can help care for more small children, even if it is only for a few moments. For your children, there is no more close vintage than with a brother. They have a built -in friendship that, hopefully, leads to adulthood. Financially, there are also some benefits of having a large family. While more people mean more mouths to feed, think about it as a scale economy. You could buy bulk and cook bigger meals. The advantage of clothing and baby equipment will also obtain. In addition, children in largest families report that they are happy on average. Children in large families teamwork, sharing, how <sup>3</sup> play and interact with large groups. They also have a buffer if a relationship <sup>3</sup> a brother or not he's tense for a while. I mean, there's always someone you let off steam or trust. As adults, their children also have the advantage of adult sibling, in-law, cousin, and grandchild relationships. If your large family grows up to have large families of your own, your built-in support network expands.While a large family offers your children constant compaĀzĀa, there are some family dynamics that are harder to navigate with more than one or two children in the mix. Dedicated to one-to-one time with you, for example, be more difficult as you have. A way to fix this? Making spending individual time with each child a priority. Set calendar dates such as a <sup>3</sup> meeting to do something for you and one of your children. Turn around so that each child has a time alone with you and your partner. Photo CortesĀa: Tetra Images/Tim Pannell/Getty Images You can also do it with mini-groups. One parent can take the children to an aquatic park, for example, while another takes the children to a towel. The older children can go to dinner with mom and dad while the younger ones are left with a child. Days like this will help ensure that children receive the care <sup>3</sup> need. Of course, finance is another sticking point <sup>3</sup> some families when it comes to having more children. More can mean a bigger home and, in addition, you can end up spending more on activities, education<sup>3</sup> travel and recreation<sup>3</sup> Family holidays may need to be a little more creative to cut costs when it comes to hotels and tickets. Depending on <sup>3</sup> where you live, the size of your home can also be a disadvantage. In high-priced housing markets or dense urban areas, square footage is very valuable. You may need to consider moving further away from a city center or living in smaller rooms ahcertse ahcertse siĀm res edeup oĵh us y ertdap nu ertne n<sup>3</sup>Aicaler aL .sajatnev sus eneit a±Āeuqep ailimaf anu reneTazĀeuqep ailimaf anu renet ed sajatneV.senoicatibah netrapmoc euq so±Āin sol noc the demands of other children on the care <sup>3</sup> their parents. EconĀ <sup>3</sup> mically, having one or two children is more profitable when it comes to housing, education<sup>3</sup> the size of their <sup>3</sup> car and recreational activities. Photo courtesy: kate\_sept2004/E+/Getty Images With one or two children, it is more feasible to help them do activities, such as sports or music, while giving them more focus and time Āĕĕĕĕĕĕĕĕ instead of running from one event to another, as they will with a larger family. In addition, traveling becomes a little easier (and less expensive) with less kids. While your child may not have any siblings, this also means there is no one to fight with. While the dynamic of siblings can lead to satisfying relationships, it can also be complicated and a source of stress, especially if your children develop a rivalry when it comes to excelling in activities or fighting for your attention<sup>3</sup> n.Disadvantages of a small familyWhile there are no rights or mistakes when it comes to determining the size of your family, having a single child can have some disadvantages. "The biggest?" Not having a sibling relationship <sup>3</sup> means much more than not having a playing partner. Only children can have more difficulties to socialize, share or have empathy for others. In addition, the father often has to be his only companion of games, entertainment and support system, which can be a challenge. Photo courtesy: LWA/Getty Images As parents get older, this also means the only child has a duty to care for them. With siblings, children can divide to help their parents if one dies or becomes ill later in life. Remember: no matter the size of the family you choose, there are pros and cons to everything. In the end, get the most out of each of your relationships, so do what you feel is right emotionally and financially for everyone in your home.
